

CODELOCKS

control + convenience

SIMPLE ACCESS CONTROL

Thank you for joining Codelocks
at Intersec 2020!

CONNECT AND CONTROL

Codelocks Smart Locks combine smart technology with traditional keypad and card access options suitable for a wide range of applications. The CL4510 and CL5510 Smart Locks are easily operated and managed directly via the keypad or via any Bluetooth compatible smartphone by downloading the K3 Connect App*. Updating settings, generating and sending access codes, or viewing audit trail information can all be done using your smartphone. Unique codes can be created with a specific start date and time, so that they automatically expire after a set duration. The codes can be sent to individuals via SMS or email and recorded via the audit trail function, allowing entry to be tightly controlled and monitored.

FEATURES & BENEFITS

- Up to 350 Users
- 100 Phone Clients
- 100 Client User Codes
- 150 Client Smart Cards
- 12 button back-lit keypad
- Keyless entry - no lost keys
- NetCode generation technology
- Set up to 10 Code Free access periods
- Suspend and Restore any or all Clients
- Mortice Latch and Mortice Lock available
- Keypad indicates locked / unlocked status
- Tamper time out and low battery warning
- Manage and operate locks via smartphone
- Personal wireless connectivity for management
- Simple upgrade from electronic range using same fixings
- Auxiliary Connections: four different modes of operation

NETCODE TECHNOLOGY

Codelocks NetCode is one of the key enabling technologies for its smart locks. With NetCode, you can provide remote access to the Codelocks Smart Lock range from anywhere in the world. The lock doesn't need to be connected to the internet in order to grant access, and you don't need to be near the lock.

Program and manage your smart lock at the touch of a button via the K3 Connect App*. Generate and send codes for easy access, issue smart cards for alternative entry, track and control via audit trail.

STILL SIMPLE JUST SMARTER

Keep track on when and which lock was accessed by downloading audit trail data

Quick and easy installation process with retrofit opportunities - perfect for upgrades

Codelocks Smart Locks are provided with all parts and instructions included

A HARMONIOUS SOLUTION

The founders of Pirate Studios, an innovative music studio rental start-up, were able to fulfil its business model by using Codelocks' CL5510 Smart Lock. It was looking for a solution that would allow musicians self-service access to recording studios at allotted times, eliminating the need for staff onsite and keeping studio hire costs down.

"We were very lucky in finding Codelocks when we did. We had a big requirement for codes that were specific for a time period, in order to make sure our security was tight. We searched high and wide across the globe for a lock that would do that for us, and the Codelocks NetCode was perfect for our requirements. Not only did it provide the functionality we needed, but also a very easy to use back-end that we were able to communicate with easily."

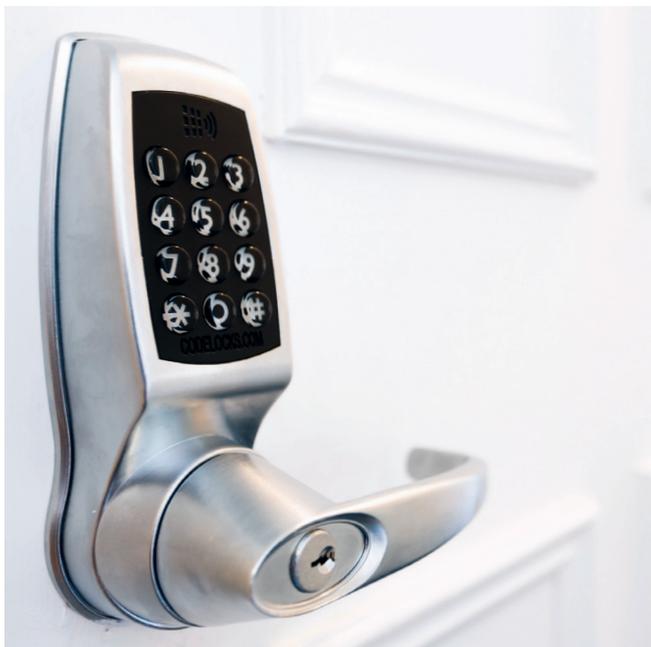

- David Borrie, Co-founder of Pirate Studios

CONVENIENCE IS KEY

Lifestyle Serviced Apartments (LSA) is a property letting specialist. The firm manages properties on behalf of landlords and other agents, renovating them and then renting them out. LSA also partners with local employers to ensure that quality tenants are found for the properties in its portfolio. As part of the renovation process, LSA wanted to find an access control solution that would secure the properties without hindering the check-in process for guests.

"Initially, we looked at solutions from various suppliers, but when we hired a company to help install the locks, they recommended we take a closer look at Codelocks," explained David Diack, Director of Lifestyle Service Apartments. "I had a meeting with Codelocks and really liked the concept. I couldn't understand how they worked at first, but Codelocks took the time to explain the technology."

Mr Diack says that, eventually, he hopes to leverage the Codelocks Application Programming Interface (API), integrating the locks with the firm's online booking system and fully automating the check in process.

"EXACTLY WHAT WE WERE LOOKING FOR: A GOOD VALUE AND CLEVERLY DESIGNED LOCK."

SMART LOCKS IN ACTION

GAME, SET, MATCH.

Parks Tennis was searching for the best way to manage access to its public tennis courts. The goal was to secure the courts, but make it easy to book and use them whilst generating income. Codelocks enabled a simple 'pay as you play' solution with the CL5510 Smart Lock. This lock gives the ability to create and send codes

remotely to customers, simplifying Parks Tennis' booking procedure and ensuring the courts remain protected and profitable.

"The CL5510 was exactly what we were looking for: a good value and cleverly designed lock, which enables time-sensitive access codes to be issued automatically. The lock is easy to use, cost-effective, and battery powered, requiring no internet or electricity to install. It works seamlessly with our existing booking systems. Codelocks are also a fantastic partner to work with – they are always available and they offer first-class support."

- Jeff Hunter, Managing Director, Parks Tennis CIC

CODELOCKS FIND THE PERFECT MATCH FOR LOYD LINDSAY ROOMS

Set in leafy Oxfordshire, the Loyd Lindsay Rooms is a unique and flexible venue, offering event facilities. From board meetings to conferences, birthdays to weddings, the staff pride themselves by offering the highest level of personal service from start to finish.

Loyd Lindsay Rooms were looking for an access control system which would be secure, easy to use and flexible for their needs. Codelocks provided the solution with the CL5510 smart lock, which can be operated and managed by code, card and phone, offering easy access and control.

FEELING HEARTBROKEN

Before discovering Codelocks, Loyd Lindsay clients had to be let into the venue. This meant that the caretaker was constantly going back and forth to the venue to let individual groups in to the rooms or to open the whole site for a function. This prompted Loyd Lindsay to look for a flexible, reliable and professional solution to their access needs.

LOVE AT FIRST SIGHT

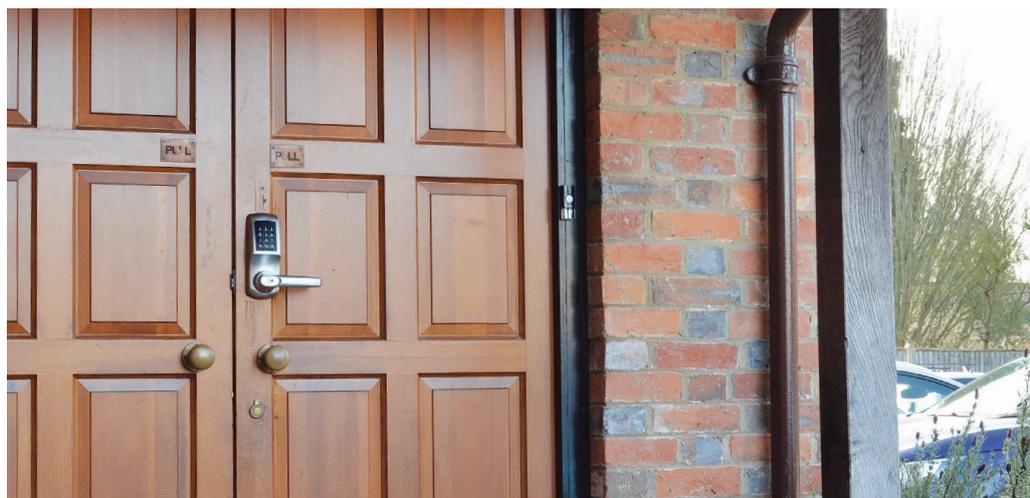

Following a presentation from local locksmiths JPriest & Son at a BNI marketing referral group, Loyd Lindsay rooms decided on a Codelocks CL5510 smart lock.

Jason Priest, owner of JPriest & Son has been working with Codelocks throughout the duration of his 30-year career, partnering with Codelocks on many projects including schools and colleges within Oxford University. Speaking of Codelocks he stated, "They are a very professional company and the development of its standalone smart lock, prevents the need for continuous code changes on site.

"The CL5510 is a quality product, reliable and versatile. With its ease of installation, we did not hesitate

to recommend this smart lock over others in the market place. It offered everything the Loyd Lindsay rooms required, it's simple to use and offers the phone, code and card options as well as a key override option. All other manufacturers could only offer some of the features, or could offer all but only in conjunction with other smart products."

Karen Smith, Manager of Loyd Lindsay rooms knew that Codelocks would be the perfect solution to their needs, "I didn't look at any alternatives as having spoken to Jason following the presentation, he assured me that Codelocks CL5510 could do everything I wanted it to. I spoke to Jason straight after the presentation who procured the lock for me."

THE ICING ON THE CAKE

As access control was The Loyd Lindsay Rooms main concern, JPriest & Son fitted a CL5510 smart lock on the front door. This lock allows codes to be created via an online portal and issued to customers via email or SMS, thus eliminating the need for a staff member to be onsite.

ABOUT CL5510

With the CL5510, controlling access has never been so convenient, especially since all aspects of the lock can be managed remotely using a smartphone. Users can choose the most suitable entry method for their needs, whether that be allowing access via a simple code or by the use of compatible smart cards. The lock audit trail data can be downloaded and viewed, to keep track of when and where the lock was accessed. Codes can be set for a specific start date and time, automatically expiring after a set duration. In addition, 'code free' periods can be set to allow free access at certain times of the day.

"The Codelocks system has allowed me to set up specific codes for individual clients to give them access to the venue without our Caretaker being present. It has also enabled me to give a one-off access code to a Contractor when I was held up in traffic. He was able to start work at the venue without having to wait around for me." - Karen Smith, manager of The Loyd Lindsay Rooms.

THE KNIGHT IN SHINING ARMOUR

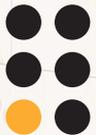

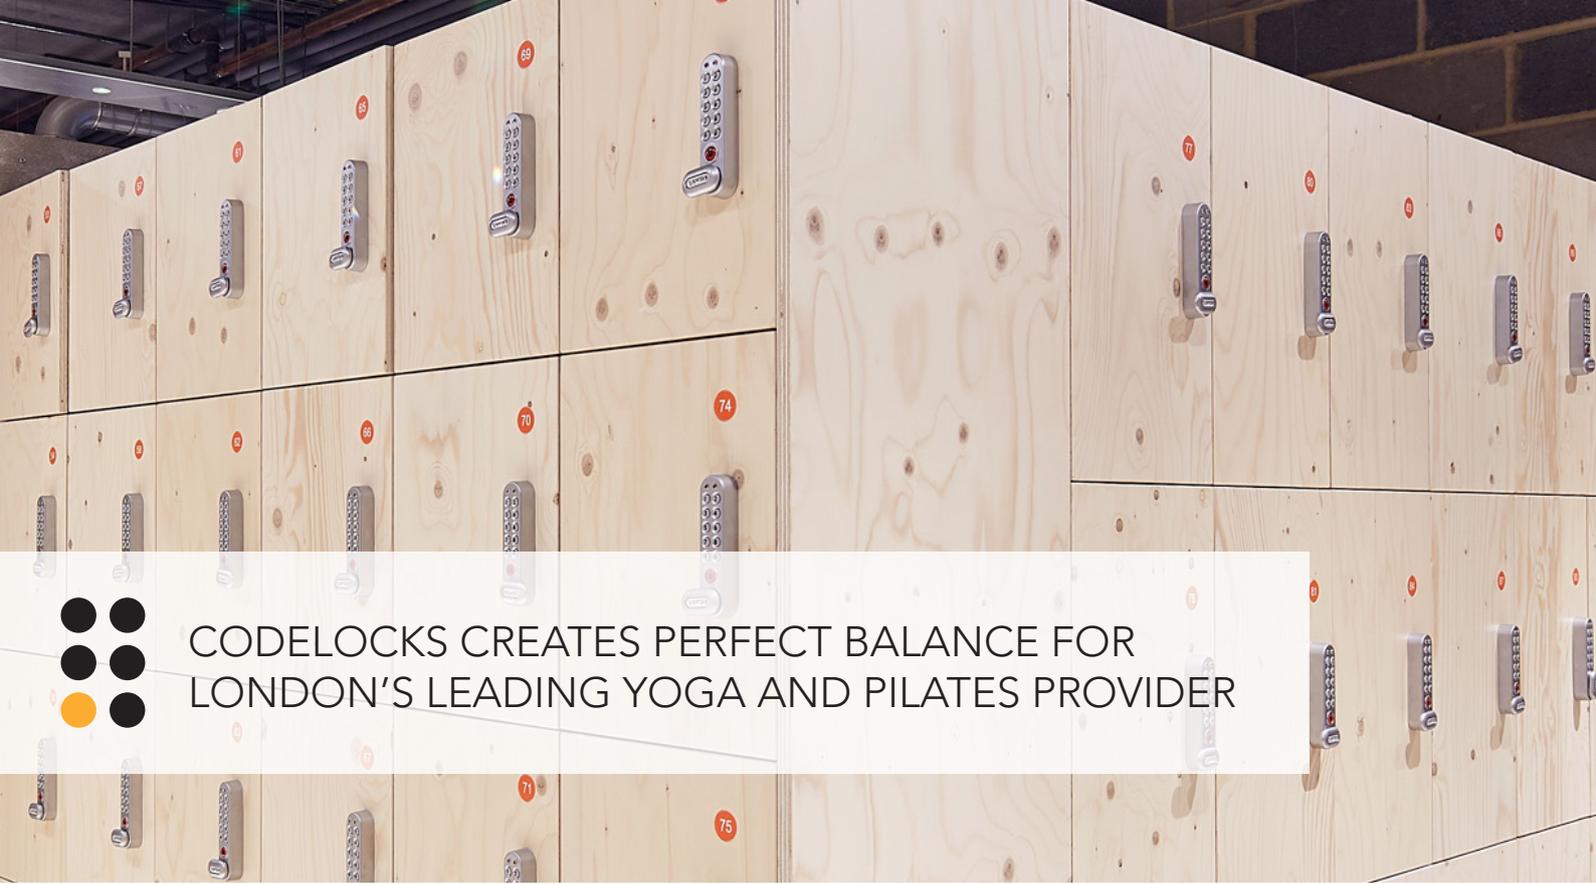

The major benefit to the Loyd Lindsay Rooms to date has been a financial one. Remote access means that the venue no longer has to pay their caretaker to go to the venue to open up and lock up after every client. The lock has also provided additional security. Previously if a client was using the venue, the front door was open which lead to people often wandering in to look around or use the facilities. With the Codelock's system, this is no longer possible.

"Our Caretaker is very pleased with not having to continuously visit the venue to open and lock up," said Karen. "The venue is now unlocked at the beginning of the day and then locked up at the end of the day – with the Codelock system being used throughout the day."

"The feedback from our clients has also been positive as they now know that they will not be interrupted by people just walking into the venue."

CODELOCKS CREATES PERFECT BALANCE FOR LONDON'S LEADING YOGA AND PILATES PROVIDER

triyoga were looking for modern, simple and secure lockers that were hassle-free for members to use. Codelocks provided the solution with the KitLock KL1000 lock, a robust, easy to use electronic locking system specifically designed to provide keyless and coinless access.

Founded in 2000, triyoga has become London's top destination for yoga, Pilates and treatments. With established centres in Camden, Chelsea, Covent Garden, Ealing and Soho, the latest addition in Shoreditch offers over 125 yoga, Pilates and barre classes per week. Each centre has been designed to create a calm, relaxing and rejuvenating space amongst London's bustle.

PEACE OF MIND

Before KitLock locker locks were installed, triyoga guests used coin operated key locks. This meant guests had to take their locker key with them to treatments and classes, often misplacing them. For triyoga staff, managing locker keys became problematic and extremely labour intensive. This prompted them to search for a lock that looked modern, was simple to operate and secure.

A FLEXIBLE SOLUTION

Following a recommendation from a locker manufacturer, triyoga specified the KitLock to the designers of the new Shoreditch centre, Aldworth James & Bond.

James Cannon, facilities manager at triyoga immediately knew they were the perfect match. "The KitLock from Codelocks ticked all the boxes, from price point to functionality and had clearly been designed with ease of use in mind. I immediately contacted Aldworth James & Bond who procured 150 of the KL1000 locks."

Dan Benson, project manager at Aldworth James & Bond explained, "The most important requirement for triyoga was that users didn't need keys."

"The KL1000 was the perfect solution for triyoga, and from start to finish the service we received from Codelocks was brilliant, we've really enjoyed working with them. Procurement was easy, installation was straightforward and we received great customer service."

THE KITLOCK EXPLAINED

The KitLock KL1000 is a digital cabinet lock ideal for replacing padlock locker mechanisms and traditional key cam locks supplied at many gyms, spas and leisure centres. It uses a four-digit code rather than a key to operate and secure the locker. In Public Function guests simply enter a code, "lock and go". When it's time to leave, the customer enters their code again and the locker opens. The code is then automatically erased, leaving the locker free for the next customer.

THE GURU OF LOCKER LOCKS

To ensure an environment of peace and tranquillity, members can now enjoy a stress-free experience without the inconvenience of carrying locker keys and coins. triyoga have programmed the locks in Public Function, allowing members to easily find a locker, whilst allowing staff members access at the end of the day for cleaning.

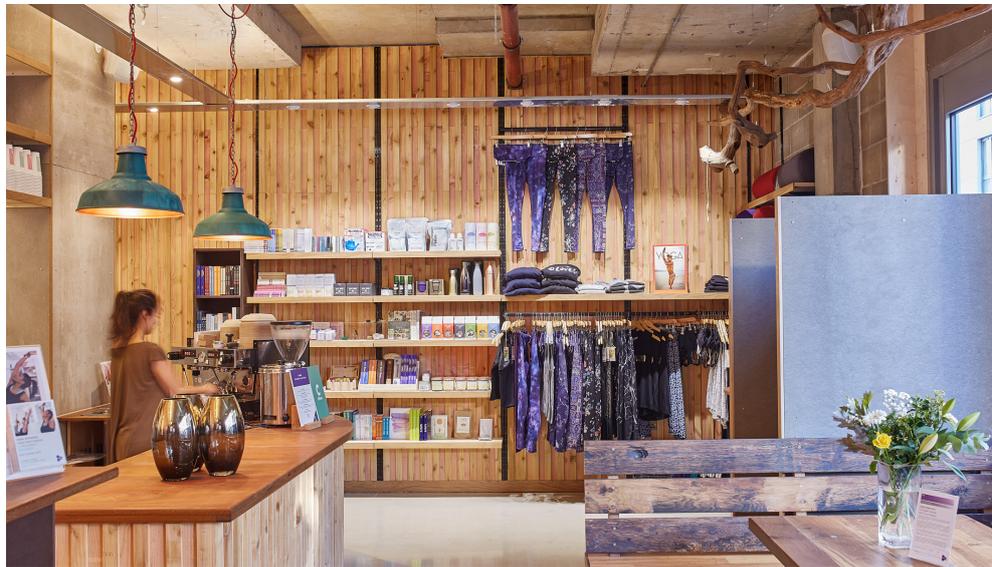

"The KitLock solution is user-friendly, secure and takes the duty of care away from us as keys are no longer left lying around," said James.

"Features such as the technician code are extremely useful when a customer forgets their code, plus we are able to open all the lockers at the end of the day and check nothing is left inside overnight.

"We designed our centres to be slick, beautiful and at the top of their game, whilst also offering comfort and convenience. The KitLock from Codelocks has allowed us to ensure that this aesthetic goes beyond the studios and treatment rooms and into the changing rooms, much more in keeping with the quality expected from our centres."

NetCode

The smart way to generate access codes

Built on the success of KitLock's most popular KL1000 locker lock, the **KL1060 NetCode** offers the same high standard of functionality, but with the added benefit of being able to remotely generate unique access codes that are time/date sensitive.

Set short, medium or long-term codes for a specific:

TIME

DATE

DURATION

Generate them via the K3 Connect App or by logging on to the online NetCode Portal

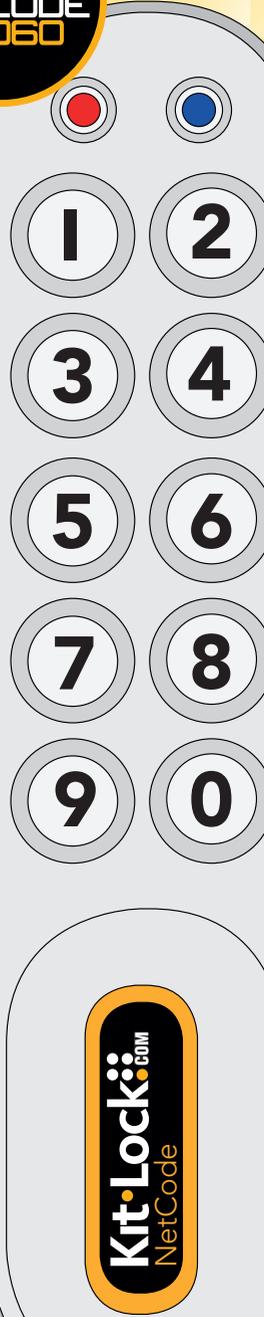

Send them to the end user via SMS or email, from wherever you are

Then, using audit trail, view the lock's history including which codes were used at what time!

Codelocks Smart Lock range gets smarter

Self-service standalone locks that are intelligent, enabling easier access control

Codelocks designs smart, digital locks which help make building managers' working lives easier. The Codelocks smart lock range includes the recently launched CL4520 in addition to the CL4510, CL5520 and CL5510. These smart locks utilise wireless technology giving users the ability to connect remotely and choose between pushbutton code, smart card or smartphone access.

Self-service entry offers accessibility outside normal working hours, helping businesses operate more efficiently around the clock. The lock can also be set in 'code-free mode' at fixed times of the day, allowing access for cleaning, maintenance or deliveries. Administrators are able to monitor access records and usage with comprehensive audit trail tools.

By using Codelocks' NetCode technology, the smart locks can be managed remotely as operators can generate and send time sensitive codes to end users using the K3 Connect App*. These codes can be accessed by any Bluetooth compatible smartphone making the whole process simple and convenient to all involved.

Codelocks also offers an Application Programming Interface (API) allowing businesses to integrate the NetCode technology into their existing systems. By automating code generation, the need for on-site staff is dramatically reduced. Businesses can recognise new levels of convenience without compromising on security.

"With so much choice available it can be difficult to know which access control product is best for each businesses' building, staff, customers and budget, and which will work alongside any current systems," said Colin Campbell, Managing Director at Codelocks. "By combining smart technology with traditional keypad and card access options, our smart locks suit a wide range of applications. From rental spaces to building and property managers, Codelocks customers around the world are recognising the benefits that our technology brings. They are also supported by our team of experts offering application advice and after sales technical support."

The newest smart lock to the range, CL4520, combines convenience and flexibility with a powerful mortice lock with a double cylinder – ideal for those who may need to deploy the key-controlled mortice lock to restrict access at specific times. Conversely, the locks can be set in code-free mode at fixed times of the day when access is required for cleaning, maintenance, deliveries or when general access is permitted.

"The CL4520 is the next generation of lock – it is smart, convenient and effective. With the introduction of a mortice lock to the system, it delivers the option of even greater levels of security," said Colin Campbell, Managing Director at Codelocks.

Versatile across a huge variety of settings, Codelocks offer advice and support to help you choose the right lock for your business.

*The locks can be managed with the K3 Connect App by any Bluetooth compatible smartphone. The App is available on Apple App Store for Apple devices or Google Play™ for Android™ devices by searching for K3 Connect. Apple, the Apple logo, and iPhone are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Android, Google Play and the Google Play logo are trademarks of Google Inc.

KEY MANAGEMENT MADE EASY

Simple and effective key control cabinets, utilizing coded access to allow authorized persons to manage keys 24 hours a day, from just a single or unique access code. The rigid-built cabinets, when combined with mechanical or digital coded locks, provide an enhanced secure enclosure for keys, fobs and padlocks. With wall-mounted and freestanding options available, there's a cabinet with a capacity that will suit a wide range of environments and industry sectors, such as: healthcare, education, hospitality and commercial.
